

WELCOME

This I2S News has only one item. We are delighted to announce that we are organising the First Global Conference for Research Integration and Implementation.

- Dates: September 8-11, 2013, with significant pre-conference activity
- Venue: Manning Clark Centre, The Australian National University and online

Find out about our innovative program at <http://www.I2Sconference.org>.

The conference is about

Linking networks:

Bringing together researchers and educators who use systems-based, action-oriented, multidisciplinary, interdisciplinary, or transdisciplinary approaches.

Taking stock:

Learning from case studies which tackle complex real-world problems such as climate change, organised crime, aged care. Compiling effective concepts and methods for synthesising knowledge, managing risk and other unknowns, and supporting policy and practice change.

Planning for the future:

Identifying common ground, establishing synergies, joining forces.

We hope you'll join us to showcase your work, hearing from leading experts, expand your networks and help plan the future – in Canberra or online. Find out more at <http://www.I2Sconference.org>.

Gabriele Bammer and Peter Deane

Integration and Implementation Sciences Team, National Centre for Epidemiology and Population Health, Research School of Population Health, ANU College of Medicine, Biology and Environment, The Australian National University, Canberra, ACT, 0200, Australia.
